

GOVERNMENT OF ASSAM
STATE COUNCIL FOR TECHNICAL EDUCATION
DIRECTORATE OF TECHNICAL EDUCATION, ASSAM

FINAL SYLLABUS OF 2nd SEMESTER

Table of Contents

S. No.	Title	From	To
1	Inclusion of NEP, 2020	2	3
2	General Course Structure & Credit Distribution	5	10
3	Detailed 2 nd Semester curriculum content	11	49
4	Curriculum Development Cell, Subject wise list of Committee Members and Reviewers	50	51

Inclusion of National Education Policy, 2020:

As envisioned in the NEP 2020 the State Council for Technical Education, Assam will be responsible for mentoring its affiliated Polytechnics so that they develop capabilities and achieve minimum benchmarks in academic and curricular matters, teaching and assessment.

State Council for Technical Education (SCTE), Assam will notify the pool of MOOCs courses duly approved by its statutory bodies and map them in Academic Bank of Credits (ABC). Affiliated Polytechnics may opt for any of these courses as required. State Council for Technical Education (SCTE) will take suitable action for preparation of syllabus for these courses including learning objective and learning outcome.

The State Council for Technical Education (SCTE) may fix the minimum number of credits to be earned by the students from a parent institution.

All the affiliating institutions will complete Academic Bank of Credits registration through SCTE. Institute will monitor the opening of ABC account by all the students.

Salient features

Salient features that are to be considered for developing the curriculum aligned to NEP 2020 are as follows:

- Reduced number of credits.
- Introduction of Student Induction Program.
- Well defined learning objectives & outcomes for each course.
- Inclusion of courses on socially relevant topics.
- Built-in flexibility to the students in terms of professional elective and open Elective courses.
- Mandatory internship to equip the students with practical knowledge and provide them exposure to real time industrial environments.
- Virtual Labs.
- Mapping of Courses to its equivalent NPTEL/SWAYAM Course.
- Course on 'Entrepreneurship and Startups' to encourage entrepreneurial mindset.
- Introduction of Design Thinking and Universal Human Value course.

Basic Guidelines:

The existing Credit System is revised as Choice Based Credit System (CBCS) in line with NEP guidelines, to infuse innovation and flexibility. No hard separation between streams, between curricular and extra-curricular, between Vocational and Academic, Multidisciplinary and holistic education across the disciplines, Ethics and Human & Constitutional values, Life skills, use of technology as part of all curriculum.

- An academic year is divided into two semesters as per AICTE guidelines.
- A semester consists of approximately 90 working days. One working week will have approximately 40 hours of instructional time.
- There shall also be a Winter Internship Program for duration of 4 weeks/one month from 1st January to -31st January.
- Summer term courses may be offered on a fast-track mode to enable students to complete arrears/special courses.

- Teachers may avail semester end vacations after the end of each semester. Subject to completion all kinds of examination related work.
- The Polytechnics under the Directorate of Technical Education can decide on the kind of courses to be offered in the summer term, based on the requirements and also based on the availability of teaching faculty.
- Internship/apprenticeship can be carried out during the winter term, mandatorily for regular student.
- Students who wish to exit after 1st year or 2nd year of study, have to undergo mandatory bridge courses as defined in the course structure.

Induction Program:

The Essence and Details of Induction program can be find from the ‘Detailed Guide on Student Induction program’, as available on AICTE Portal,

(Link: <https://www.aicteindia.org/sites/default/files/Detailed%20Guide%20on%20Student%20Induction%20program.pdf>),

The Induction program for students to be offered right at the start of the first year for three-week duration.

- Physical activity
- Creative Arts
- Universal Human Values
- Literary
- Proficiency Modules
- Lectures by Eminent People
- Visits to local Areas

Mandatory Visits/ Workshop/Expert Lectures:

- a) It is mandatory to arrange one industrial visit every semester for the students of each branch.
- b) It is mandatory to conduct a One-week workshop during the winter break after fifth semester on professional/ industry/ entrepreneurial orientation.
- c) It is mandatory to organize at least one expert lecture per semester for each branch by inviting resource persons from domain specific industry

GENERAL COURSE STRUCTURE & CREDIT DISTRIBUTION

A. Definition of Credit:

1 Hr. Lecture (L) per week	1 credit
1 Hr. Tutorial (T) per week	1 credit
1 Hr. Practical (P) per week	0.5 credit
2 Hours Practical (P) per week	1 credit

B. Range of Credits:

In the light of the fact that a typical Model Four-year Under Graduate degree program in Engineering has about 160 credits, the total number of credits proposed for the three-year Diploma program in Engineering & Technology is 120.

C. Structure of Diploma Engineering program:

The structure of Diploma Engineering program shall have essentially the following categories of courses with the breakup of credits as given:

Sr. No.	Category	Suggested Breakup of Credits
1.	Humanities & Social Sciences courses	8*
2.	Basic Science courses	19*
3.	Engineering Science courses	15*
4.	Program Core courses (Branch specific)	45*
5.	Program Elective courses (Branch specific)	12*
6.	Open Elective courses (from other technical and /or emerging subjects)	9*
7.	Project work, seminar and internship in industry or elsewhere	12*
8.	Audit Courses [Environmental Sciences, Induction training, Indian Constitution, Essence of Indian Traditional Knowledge etc.]	(non-credit)
	Total	120*

*Minor variation is allowed as per need of the respective disciplines.

D. Course code and definition:

Course code	Definitions
L	Lecture
T	Tutorial
P	Practical
HS	Humanities & Social Sciences Courses
BS	Basic Science Courses
ES	Engineering Science Courses
PC	Program Core Courses
PE	Program Elective Courses
OE	Open Elective Courses
AU	Audit Courses
SI	Summer Internship
PR	Project
SE	Seminar

E. Course level coding scheme:

Three-digit number (odd numbers are for the odd semester courses and even numbers are for even semester courses) used as suffix with the Course Code for identifying the level of the course e.g.

101, 102 ... etc. for first year

201, 202 Etc. for second year

301, 302 ... for third year

F. Evaluation Scheme for 2nd Semester of Diploma in Engineering courses under State Council for Technical Education (SCTE), Assam

For Theory Courses:

(The weightage of Internal assessment is 40% and for End Semester Exam is 60%) The student has to obtain at least 40% marks individually both in internal assessment and end semester exams to pass.

For Practical Courses:

(The weightage of Internal assessment is 60% and for End Semester Exam is 40%) The student has to obtain at least 40% marks individually both in internal assessment and end semester exams to pass.

For Summer Internship / Projects / Seminar etc.

Evaluation is based on work done, quality of report, performance in viva-voce, presentation etc.

Note: The internal assessment is based on the student's performance in mid semester tests (two best out of three), quizzes, assignments, class performance, attendance, viva-voce in practical, lab record etc.

G. Mapping of Marks to Grades

Each course (Theory/Practical) is to be assigned 100 marks, irrespective of the number of credits, and the mapping of marks to grades may be done as per the following table:

Range of Marks	Assigned Grade	Grade Point	Remarks
91-100	A ⁺	10	Outstanding
81-90	A	9	Excellent
71-80	B ⁺	8	Very Good
61-70	B	7	Good
51-60	C ⁺	6	Average
46-50	C	5	Below Average
40-45	D	4	Pass
< 40	F (Fail due to less marks)	-	Fail
-	F ^R (Fail due to shortage of attendance and therefore, to repeat the course)	-	-

H.Credit Distribution, Mark Distribution and Break up of Internal Assessment Marks as per following table:

a) Credit Distribution:

Semester-II

S. No.	Course Code	Course Title	L	T	P	Credit
1	BS-201	Mathematics-II	3	1	0	4
2	BS-202	Applied Physics-II	2	1	0	3
3	ES-202	Introduction to IT Systems	2	0	0	2
4	ES-204	Fundamentals of Electrical and Electronics Engineering	2	1	0	3
5	ES-206	Engineering Mechanics	2	1	0	3
6	BS-207	Applied Physics Lab– II	0	0	2	1
7	ES-208	Introduction to IT Systems lab	0	0	4	2
8	ES-209	Fundamentals of Electrical and Electronics Engineering lab	0	0	2	1
9	ES-210	Engineering Mechanics lab	0	0	2	1
10	AU-201	Environmental Science	2	0	0	0
TOTAL CREDIT=						20
Total Hours per week = 27 [L=13; T=4; P=10]						

b) Marks Distribution

Semester – II

S. No.	Course Code	Course Title	Internal Assessment (Theory)		ESE		Internal Assessment (Practical)		Practical Test		Total Marks (Course)	Pass Marks (Course)
			Total Marks	Pass Marks	Total Marks	Pass Marks	Total Marks	Pass Marks	Total Marks	Pass Marks		
1	BS-201	Mathematics-II	40	16	60	24	-	-	-	-	100	40
2	BS-202	Applied Physics-II	40	16	60	24	-	-	-	-	100	40
3	ES-202	Introduction to IT Systems	40	16	60	24	-	-	-	-	100	40
4	ES-204	Fundamentals of Electrical and Electronics Engineering	40	16	60	24	-	-	-	-	100	40
5	ES-206	Engineering Mechanics	40	16	60	24	-	-	-	-	100	40
6	BS-207	Applied Physics Lab– II	-	-	-	-	60	24	40	16	100	40
7	ES-208	Introduction to IT Systems lab	-	-	-	-	90	36	60	24	150	60
8	ES-209	Fundamentals of Electrical and Electronics Engineering lab	-	-	-	-	90	36	60	24	150	60
9	ES-210	Engineering Mechanics lab	-	-	-	-	60	24	40	16	100	40
10	AU-201	Environmental Science	40	16	60	24	-	-	-	-	100	40
Total											1000	

N.B: The marks of Audit Course is not included in total marks.

c) Break Up of Internal Assessment Marks

Internal Assessment for Theory (TA+HA&CT)

Component	Teacher's Assessment (TA)			Home Assignment & Class Test (HA&CT)				Total
	Attendance	Discipline	Class Participation	Home Assignment	Presentation / Seminar	Quiz	Class Test	
Maximum Marks	5	1	2	4	6	2	20	40
Note: Three (3) class tests must be conducted for each course. For calculation of Internal Assessment, best two (2) class tests out of the three (3) conducted is to be considered.								

Internal Assessment for Practical (PA)

(i). For 60 marks

Component	Maximum Marks
Teacher's Assessment (TA)	
Attendance	10
Discipline	2
Practical Assignment	
Practical Work and/or Laboratory Report	30
Presentation	10
Viva	8
Total	60

(ii). For 90 marks(IT System Lab/FEEE Lab)

Component	Maximum Marks
Teacher's Assessment (TA)	
Attendance	10
Discipline	5
Practical Assignment	
Practical Work and/or Laboratory Report	45
Presentation	15
Viva	15
Total	90

Note: Student must pass in Internal Assessment (Theory & Practical). If a student fails in Internal Assessment, he/she will not be allowed to appear in the End Semester Examination.

d) Grading System proposed is Absolute Grading System.

e) Conversion factor from Cumulative Grade Point Average (CGPA) to Percentage (%) is 10.

Range of Attendance with Marks (for Theory):

Sl No.	Range of Attendance	Marks
1	96% and above	5 Mark
2	91% to 95%	4 Mark
3	86% to 90%	3 Mark
4	81% to 85%	2 Mark
5	76% to 80%	1 Mark
6	75%	Only permitted to appear in the exam
7	Between 60% to 75%	NC: May appear in the exam if there are genuine reasons
8	Below 60%	DC: Cannot appear in the exam

Range of Attendance with Marks (for Practical):

Sl No.	Range of Attendance	Marks
1	96% and above	10 Mark
2	91% to 95%	9 Mark
3	86% to 90%	8 Mark
4	81% to 85%	7 Mark
5	76% to 80%	5 Mark
6	75%	Only permitted to appear in the exam
7	Between 60% to 75%	NC: May appear in the exam if there are genuine reasons
8	Below 60%	DC: Cannot appear in the exam

Valid Ground for Non-collegiate students:

1. Medical grounds.
2. Participation in a state/national level competition, including the journey period as approved by the Head of Institution.
3. Participation in a seminar of national/international level, workshop or conference, including the journey period as approved by the Head of Institution.
4. Participation in voluntary programmes conducted by the Institute/Directorate as per Government notification.
5. Any other grounds which the Examination Committee, in consultation with the Secretary, SCTE may approve.

Current Examination Fee structure:

- Non Collegiate Fees: Rs. 300/- (per subject)
 - Examination Fee: Rs. 500/-
 - Retest Fee: Rs. 200/- (per subject)
- N.B: The rates may be changed subject to Government order.

Conditions for Dis-Collegiate (DC) student:

- (i) Any candidate who is an internal student but has attended less than 60% of classes in any one or more subjects on theory and/ or practical shall not be eligible to appear in the respective semester examination and termed as Dis-collegiate student.
- (ii) Dis-collegiate students will have to repeat the semester by taking admission in the next session.

Note: The above guidelines may be changed/modified as per AICTE and Government of Assam notification from time to time.

Detailed Second Semester Curriculum Contents (Common to all Branches)

1. Course Title: Mathematics-II

1. **SUBJECT/ COURSE CODE: BS-201**

2. **Semester: Second semester**

3. **Objectives:** The main objectives of this course are:

- i) To learn about the circle and conic section.
- ii) To learn about the three dimensional Co-ordinate geometry.
- iii) To learn about measures of central tendency of statistical Data.
- iv) To learn about relations and functions of variables and their derivatives.
- v) To learn about integration methods and its applications for measuring areas.

4. **Course Outcome:** On completion of the course, students will be able to

CO -1. Recognise and differentiate between closed and open curves under different conditions

CO -2. Locate and object in space and calculate its distance with reference to other objects.

CO - 3. Understand several numerical methods belonging to measure of central tendency to describe the characteristics of a data set.

CO -4. Obtain Derivative of a function and its application.

CO- 5. Obtain Integration of a function and its application using properties of Definite Integral.

5. **Teaching scheme(in hours):**

Teaching scheme(in hours)		
Lecture	Tutorial	Total per week
3	1	4

6. **Detailed course content:**

Chapter No	Chapter Title	contents	Intended learning outcomes	Hour (Theory) 45
Group - A : CO-ORDINATE GEOMETRY (TWO and three DIMENSION) Hours: 8 Marks: 10				
A1	Co-Ordinate geometry of two dimensions	1.1 Circle: Standard equation , Equation of a circle under different conditions. Introduction to the concepts of Parabola , Ellipse and hyperbola (related simple problems)	1.Define and explain the concept of a circle. 2.Define conic section.	5

A2	Co-Ordinate geometry of three dimensions	2.1 Three dimensions Co- Ordinate system . Distance formulae, Section formulae, direction cosines, direction ratios.	Locate a point in space , find its locus, distance from other points , objects(linear as well as angular)	3
GROUP- B Statistics HOURS : 4 MARKS : 5				
B1	Measure of Central Tendency .	Mean, Median and Mode. (simple problems.) Relation between mean median and Mode.	Understand Basic measures of Central Tendency.	4
GROUP- C DIFFERENTIAL CALCULUS HOURS : 19 MARKS : 25				
C1	Function	1.1. Definition of Function and type of functions. Odd and even function, Periodic, composite, explicit, implicit and Parametric functions 1.2. Domain , Range, and co- domain of function .	Understand the different type of functions and their Domain and Range.	3
C2	Limit of a function	2.1. Definition , standard limits . 2.2. Evaluation of limits.	Understand Limit of a function under different conditions.	3
C3	Continuity of a function .	3.1. Definition , testing of continuity problems .	Learn behaviour of continuous and discontinuous functions .	2
C4	Differentiation or Derivative of a function.	4.1.Differentiation of some Standard functions using first Principle of derivative. 4.2. Derivative of Function of a function, implicit function and Parametric Functions. Engineering application problems.	1. Understand the meaning of differentiation. Learn to obtain derivatives of different type of functions.	3 3

		4.3. Geometrical interpretation of first order derivative Equation of Tangent, normal.	Understand the Geometrical significance of derivatives.	2
		4.4. Second order derivative. Maxima, Minima, Engineering application of Second order derivative .	Learn to find higher order Derivative and their application.	3
GROUP- D INTEGRAL CALCULUS HOURS : 14 MARKS : 20				
D1	INTEGRATION	1.1 Integration as inverse process of differentiation. List of formulae .	Understand the meaning of integration .	2
D2	Method of Integration	Integration by method of substitution. Integration by parts. Integration by algebraic fractions.	Learn the different methods of integration.	5
D3	Definite Integral	3.1 Definition, Fundamental theorem on Definite Integral Properties of Definite Integral 3.2. Evaluation of Definite Integrals using fundamental laws and properties.	Learn and apply different properties of Definite Integral to solve problems .	5
D4	Application of Integration	4.1. Area under curve.	Know the application of Definite Integral.	2

7. Distribution of Marks :

Chapter no.	Chapter Title	Type of question			Total
		Objective Type	Short questions	Descriptive questions	
A1	Co-Ordinate geometry of two dimensions	1	2	3	
A2	Co-Ordinate geometry of three dimensions	1		3	
B1	Measure of Central Tendency .	2		3	
C1	Functions	2	2		
C2	Limit of a function	2		3+3	
C3	Continuity of a function .	1	2		
C4	Differentiation or Derivative of a function.	2	2	3+3+3	
D1	Integration	1			
D2	Method of Integration	2	2	3	
D3	Definite Integral	1	2	3	
D4	Application of Integration			3	
		15	12	33	60

9. Suggested implementation strategies: The syllabus can be completed by taking regular classes along with tutorial classes. Audio-Visual aids also can be used.

10. Suggested learning resources:

Text Books (T1, T2):

1. An Introduction to Polytechnic Mathematics Vol- II by Geetali Das , Ajanta Choudhury, Parbin Ahmed.
2. Engineering mathematics by H.K Das .
3. Applied Mathematics (Vol I & II) by RD Sharma.
4. Calculus for beginners by R.K Chakravorty .

Annexure – 1

TABLE OF SPECIFICATION FOR THEORY:

Sr. no	Topic (a)	Time allotted in hours (b)	Percentage weightage(c)	k	C	A	HA
1	CO-ORDINATE GEOMETRY (TWO and	8	17.8%	2	2	6	

	three DIMENSION)						
2	Statistics	4	8.9%	2	...	3	
3	DIFFERENTIAL CALCULUS	19	42.2%	7	6	15	
4	INTEGRAL CALCULUS	14	31.1%	4	4	9	
	Total	45	100	15	12	33	

K = knowledge C = Comprehension A = application

HA = Higher than application (Analysis , Synthesis , Evaluation).

$$C = \frac{b}{\sum b} \times 100$$

XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX

2. Course Title: Applied Physics-II

1.Course Title: Applied Physics - II

2.Course code: BS-202

3. Prerequisites: High School Level Physics

4. Rationale of the subject: Physics is a foundation of all core technology subjects. Study of Physics is essential for Diploma holders in engineering and technology to develop in them proper understanding of physical phenomenon, scientific temper and engineering aptitude. Curriculum of Applied Physics includes fundamental concepts used in industrial applications. So, physics is taught in the 1st and 2nd semester in all disciplines of Diploma Engineering.

5. LEARNERS OBJECTIVES: After completion of the course learners will be able to:

- a) learn and understand different physical quantities.
- b) learn and understand different laws of light, magnetism,
- c) understand about properties of matter, transmission of heat, wave and oscillation.
- d) learn about photo electric effect, radioactivity, X-ray and laser.
- e) tackle engineering problems in their chosen area of application.

6. Course outcome: After completion of the course, students will be able to:

C.O.1: apply core concept in materials like properties of matter, heat transmission etc. for different engineering tasks.

C.O.2: identify different factors affecting acoustical planning of buildings

C.O.3. Develop a comprehensive understanding of the fundamental laws of light, including reflection, refraction, total internal reflection and their applications in optical fibre.

C.O.4. apply the core concept of magnetism.

C.O.5: use the properties of laser, X-rays, Becquerel rays and photoelectric effect for various Engineering applications.

7. Teaching Scheme (in hours):

Theory			Practical	Total

10. DETAILED COURSE CONTENTS:

Chapter	Title of Chapter	Topics and Sub-topics	Teaching Hours	Marks
1	PROPERTIES OF MATTER	1.1 Elasticity, definition of deforming force, restoring force, Elastic and plastic body stress and strain and their types, modulus of elasticity (Young's modulus, Bulk modulus and Rigidity modulus) and their units; Hooke's law, significance of stress-strain curve. (numerical problems) 1.2 Definition of thrust, pressure and their units, pressure inside a liquid, Pascal's law of transmission of liquid pressure and its application to Hydraulic press and Hydraulic brakes. Buoyancy, Archimedes principle, density and specific gravity (relative density) their relation. Determination of Specific gravity, numerical problems. 1.3 Surface Tension: Definition and its units, Viscosity: Definition, coefficient of viscosity and its unit.	4	9
2	WAVE AND OSCILLATION	2.1: Periodic motion, oscillatory motion, Definition of Simple harmonic Motion, Its geometrical representations, Expression for amplitude, velocity, acceleration, time period, frequency etc. Simple Pendulum, expression for its time (derivation not required), second's pendulum. Free and forced vibrations, Resonance. 2.2: Wave motion, Characteristics, Types of wave motions (longitudinal and transverse waves) with examples, Definitions of parameters related to wave motion (time period, frequency, amplitude, wavelength, wave velocity) and their relations. Stationary wave, properties of stationary wave, Difference between progressive and stationary wave. 2.3. Propagation of sound, Newton's formula velocity of sound in air and Laplace's correction, factors affecting velocity of sound in air. 2.4. Audible range, ultrasonic and	6	10

		infrasonic sound, application of ultrasonic to calculate the depth of an ocean. 2.5. Reflection of sound, echo, minimum distance of the reflector to produce echo, reverberation, reverberation time, Sabine's law, acoustic requirements of a good auditorium. Doppler's effect (details not required)		
3	LIGHT	3.1: Recapitulation of laws of light (Reflection and refraction of light), idea of real and virtual image, reflection from plane mirror and spherical mirror, mirror formula, (mirror formula to be assumed), sign convention, ray diagram, nature, position and size of images for different positions of object. Applications of mirrors. Refractive index, apparent depth, critical angle, total internal reflection, relation between critical angle and refractive index, 3.2: Optical Fiber: Introduction, Basic principle of optical fibre, structure and classification, acceptance angle and numerical aperture, applications of optical fibres. 3.3: Refraction through prism, minimum deviation. Relation between R.I. and angle of minimum deviation, numerical. 3.4: Refraction through lens, lens formula (to be assumed), sign convention, magnification, nature, position and size of images for different positions of object, power of a lens, numerical. Optical instruments: Telescope (Terrestrial and Astronomical), magnifying power.	6	10
4	MAGNETISM	4.1: Recapitulation of magnetism, properties of magnet, magnetic field, and magnetic lines of force, theory of magnetism, induced magnetism, properties of magnetic lines of force. 4.2: Inverse Square law of magnetism, its explanation with mathematical expression, permeability, types of		

		substances (paramagnetic, diamagnetic and ferromagnetic), magnetic potential & magnetic intensity, calculation of magnetic intensity due to a dipole on end-on & broad-side on position, magnetic moment, couple on a magnet in a uniform magnetic field, Tangent law and its mathematical expression, Deflection Magnetometer. 4.3: Terrestrial magnetism, elements of terrestrial magnetism, explanation of declination, dip/inclination, and horizontal component of earth's magnetic field.	3	8
5	MODERN PHYSICS	5.1. Photo Electric Emission: Planks quantum theory, photo electric effect, Characteristics of photoelectrons, Einstein Photo Electric equation, Photo electric cells (Photo emissive cell, Photo-Conductive cell and photo voltaic cell) and its applications 5.2. Radioactivity, Becquerel Rays, Binding Energy and Mass Defect, natural and artificial radioactivity, Radioactive Disintegration, Applications of radioactivity (nuclear fission, nuclear fusion, and nuclear fuel) 5.3.X-rays, properties, application in industry and medical field (Production apparatus not necessary). 5.4. LASER, Stimulated or induced absorption, spontaneous and stimulated or induced emission, principle of laser, metastable state, population inversion and pumping, components of laser, Properties of laser, different types of lasers (details not required), applications of laser.	4	9
		6.1: Concept of heat and temperature and their units, heat capacity, specific heat, water equivalent; Principle of calorimetry, measurement of specific heat of a substance. (numerical problems) 6.2: Different scales of temperature measurement, their relationship and numerical examples, thermometers (Mercury thermometer, Platinum resistance thermometer &		

6	HEAT AND THERMODYNAMICS	Pyrometer) basic idea. 6.3: Modes of heat transfer (conduction, convection, and radiation with examples), thermal conductivity, its unit. 6.4: Change of state of a body, Fusion/melting, laws of fusion, effect of pressure on melting point, Regelation, Vaporization, boiling point, Laws of ebullition, latent heat, numerical problems. Evaporation, difference between vaporization and evaporation, factors on which rate of evaporation depend. 6.5: Expansion of solids, liquids and gases; coefficient of linear, areal and cubical expansions and relation amongst them (deduction not required), expansion of liquid, coefficient of real and apparent expansion, Anomalous expansion of water (experiment determination not necessary). Expansion of gases, gas laws, Boyle's law, verification of Boyle's law 6.6: Thermodynamic system, Zeroth law of thermodynamics, Thermal equilibrium, Concept of heat; internal energy, First and Second law of thermodynamics significances and limitations, basic idea of heat engines.	6	12
7	Nano physics	7.1. Introduction to nanomaterial, nature and types of nanomaterials and their applications.	1	2

11. Distribution of Marks:

Chapter No.	Chapter Title	Hours	Type of Question			Total Marks
			Objective type Compulsory	Short Question	Descriptive Question/numerical

3. Course Title: Introduction to IT Systems

Course Code : ES – 202
Credits- 2 (L: 2, T: 0, P: 0)

Course Objectives:

- This course is intended to make new students comfortable with computing environment
- Learning basic computer skills
- Learning basic application software tools
- Understanding Computer Hard-ware and Cyber security awareness

Course outcomes (Theory):

At the end of the course student will be able to

- CO 1 Explain the basic components and functions of computer hardware and software.
 CO 2 Solve problems related to number systems.
 CO 3 Design static web pages using HTML and CSS .
 CO-4 Familiarize with Open office writer, calc and Impress.
 CO-5 Explain the different threats and security measures related to protection of computer systems.

Detailed Course Content

Unit	Unit Title	Content	Hours
I	Introduction to computer systems:	Definition of Computer System, Block Diagram of Computer System. Component of Computer System - Hardware and Software. Hardware components – CPU, Memory (types), Display Units (types), Key-board, Mouse, HDD, SSD and other Peripheral Devices. Software: Types of Software – Application Software, System Software and Utilities Software. Overview of Operating Systems - What is an OS? OS Functions, Brief history on Evolution of OS. Types of OS. OS Processing – (Batch, Multi-programming, Multitasking, Real-time, Timesharing), Operating System Structures.	7
II	Basics of Number system and codes	Binary, octal, hexadecimal and decimal Number systems and their inter conversion, Different types of Codes - BCD Code, Gray Code, ASCII Code, EBCDIC Code, Unicode, ISCII.	4
III	Basic Internet skills	Understanding browser, types and efficient use of search engines, IP address, http, https, Cookies, how to delete browser data, downloads, emails and Awareness about Digital India portals (state and national portals) and college portals.	3

IV	HTML 4, CSS basics	HTML – Introduction □ HTML – Elements □ HTML – Tags □ HTML – Text □ HTML – Formatting □ HTML – Pre □ HTML – Attributes □ HTML – Font □ HTML – Text Links □ HTML – Comments □ HTML – Lists □ HTML – Images □ HTML – Image Links □ HTML – Tables □ HTML – Bgcolor □ HTML – Color Codes □ HTML – Color Chart □ HTML – Background □ Web Forms □ HTML – Forms □ HTML – Input □ HTML – Text Fields □ Hidden Fields □ HTML – Password □ HTML – Reset • HTML – Submit □ HTML – Checkboxes □ HTML – Radio □ HTML – Select □ HTML – Hidden Fields □ HTML – Upload □ HTML – Textarea □ Special Tags □ HTML – Body □ HTML – Meta □ HTML – Style □ HTML – Div □ HTML – Layouts □ HTML – Frames □ Formatting Tags □ HTML – Bold □ HTML – Paragraphs □ HTML – Headings □ HTML – Line Breaks CSS: CSS Introduction □ CSS Syntax □ CSS Id & Class □ CSS Styling □ Styling Backgrounds □ Styling Text □ Styling Fonts □ Styling Links □ Styling Lists • Styling Tables □ CSS Border □ CSS Margin □ CSS Display □ CSS Positioning □ CSS Align □ CSS Types - Inline, Internal and External.	7
V	Office Tools	OpenOffice Writer, OpenOffice Spreadsheet (Calc), OpenOffice Impress. Open Office Tools: Writer – Page setup, Table, Insertion of Pictures, Page Layout, Bullets, Insertion of objects and symbols, Header, Footer, Page Number, etc., Calc-format cell properties, formula, sort and filters, chart. Impress – Addition and Deletion of Slides, Design, Animation, Slide Show etc.	3
VI	Information security best practices	What is Information Security & Why do you need it? – Basics Principles of Confidentiality, Integrity and Availability Concepts, Policies, procedures, Guidelines, Standards Administrative Measures and Technical Measures, People, Process, Technology. Threats to Cybersecurity - Viruses, Worms, Phishing, Malware, Trojans, Spyware, Adware, Rootkits, Email hijacking. Methods to protect your personal computers – What is Antivirus? Types of Antivirus. Firewalls.	6

4. Course Title: Fundamentals of Electrical and Electronics Engineering

Course Code	:	ES 204
Course Title	:	Fundamentals of Electrical and Electronics Engineering
Number of Credits	:	3 (L: 2, T: 1, P: 0)
Prerequisites	:	NIL
Course Category	:	ES

Aim:

To equip students with fundamental knowledge of electrical and electronic concepts, necessary parts, and circuit analysis methods so they can comprehend and know how basic systems work and get ready for more complex engineering coursework.

Course Objectives:

- To give students a foundational understanding of the various electrical and electronic engineering concepts and elements,
- To provide information on active and passive electronic components, signals, digital electronics, and their uses,
- To assist them in navigating the principles and applications of electrical and electronics engineering in various industrial processes.

COURSE OUTCOME (CO):

On completion of the course, the student will be able to:

CO1- Understand the different electrical and electronics circuit elements, signal waveform, logic gates.

CO2- Classify different electrical and electronic circuits.

CO3- Solve basic problems related to electrical circuits and digital electronics.

CO4- Compare the various types of wiring systems and analyze different digital logic gates.

Course Content:

ELECTRICAL ENGINEERING			
Chapter No.	Chapter Title	Course Content	Duration Hours
1.	Fundamentals of Power generation Sources	A brief idea on: Conventional Power- Hydro, Thermal and Nuclear power generation Non-Conventional Power- Solar, Wind, Ocean Energy, Bio-Mass and Geo-thermal	02
2	Electric and Magnetic Circuits	Ohm's Law, Definition of EMF, Current, Potential Difference, Power and Energy; M.M.F, magnetic force, permeability, Idea on hysteresis loop, reluctance, leakage factor and BH curve; Analogy between electric and magnetic circuits.	05
3	AC circuits	Introduction to Cycle, Frequency, Periodic time, Amplitude, Angular velocity, RMS value, Average value, Form Factor, Peak Factor, impedance, phase angle, and power factor; j-	08

		operator; Mathematical and phasor representation of alternating emf and current; Basics of A.C circuits (purely R, L, C, R-L series, R-C series, R-L-C series and parallel circuits); Power in A. C. Circuits, Power, Voltage and Impedance triangle.	
4	Transformer and Electrical Machines	General construction and working principle of transformer; Core and Shell type transformers; Transformation ratio; Auto- transformers; Construction and Working principles of DC & AC machines	06
5	House wiring	Introduction to Internal House Wiring; Methods of house wiring and comparison; Wires and Cables; Electrical hazards and Safety measures.	04
ELECTRONICS ENGINEERING			
6	Basics of Electronics	Energy band diagram, intrinsic and extrinsic semiconductor, doping, P- type & N-type semiconductor, PN junction diode, forward bias & reverse bias characteristics of PN junction diode, introduction to half and full wave rectifier circuits, filter circuits. Transistor: Physical construction of bipolar PNP and NPN transistor, biasing circuit configuration (CE, CB, CC) and comparison. Elementary idea of LED, LCD, 7-segment display	08
7	Fundamentals of Digital Electronics	Difference between Analog and Digital signals, Introduction to Boolean Algebra, Electronic Implementation of Boolean Operations, Logic Gates, Introduction to Combinational circuit, Sequential circuit and Storage elements (Flip Flops & Counters)	05
8	Micro-electronic Technology	Introduction to Integrated Circuits – advantages and disadvantages, Uses of IC. Types of ICs-Linear and Digital, Monolithic and Hybrid. Overview of IC manufacturing process – Wafer processing, Photolithography, Etching, Ion Implementation, Doping, Testing, Packaging, packaging types	04
9	Class Test		03

5. Course Title: Engineering Mechanics

Course Code	ES - 206				
Category	Engineering Science Course				
Course Title	Engineering Mechanics				
Scheme and Credits	L	T	P	Credits, C	Semester-II
	2	1	0	3	
Pre-requisites (if any)	Physics, Mathematics, Engineering Drawing				

LEARNING OBJECTIVES:

At the end of the lessons the students will be able to:

LO1	Calculate magnitude and direction of the resultant of coplanar concurrent and non-concurrent forces applying parallelogram law, method of resolution of force.
LO2	Establish triangle law of force, polygon law of force by the aid of Bow's notation, space diagram, vector diagram for calculating graphically magnitude and direction of coplanar concurrent and non concurrent forces.
LO3	Compute moment, couple and find the position of the resultant force analytically by applying Varignon's theorem for coplanar concurrent and non-concurrent forces and graphically for parallel forces.
LO4	Construct free body diagram of a body to compute equilibrant, individual forces for a system of coplanar concurrent and non-concurrent forces analytically and graphically by applying the Lami's theorem, algebraic conditions of equilibrium
LO5	Determine support reactions of simply supported beam with vertical point load, inclined point load, uniformly distributed load and uniformly varying load by analytical and graphical methods.
LO6	Examine truss with the aid of method of section, method of joints and graphical method.
LO7	Compute centroid and centre of gravity of plane lamina, composite sections of not more than three geometrical figures and composite solids of not more than two simple solids.
LO8	Compute moment of inertia of simple geometrical figure and composite sections, section modulus, radius of gyration by applying general formula, method of integration, theorem of parallel and perpendicular axis.
LO9	Determine friction, co-efficient of friction and employ Coulomb's law of friction to study equilibrium of a body on a rough horizontal plane, rough inclined plane, ladder friction and wedge friction
LO10	Establish the law of machine and compute reversibility, irreversibility, M.A, V.R and efficiency of various simple lifting machines.

COURSE OUTCOMES:

On successful completion of the course the students will be able to:

CO1	Solve simple engineering problems by making use of the concepts and principles of statics as applied to coplanar concurrent, non-concurrent and parallel forces and force system.
CO2	Solve simple problems on equilibrium of a body, static friction, ladder friction and wedge friction under the influence of coplanar concurrent and non-concurrent forces as applicable by utilizing the concepts of free body diagram, Lami's theorem, algebraic conditions of equilibrium, Coulomb's law of friction or suitable principles of statics.
CO3	Analyze a truss by applying method of joints and section and also calculate support reactions of a beam subjected to various load conditions.
CO4	Identify the centroid or centre of gravity of simple and composite plane lamina or solids and calculate the moment of inertia of simple and composite plane lamina by applying suitable methods, law, principles and theorems.
CO5	Apply the concepts and principles of lifting machine in solving problems related to simple machines, law of machine and simple lifting machines.

Detailed Syllabus:

Units	Detailed Contents	Contact Hour
UNIT-I	Force vector representation, System of a force, Principle of Transmissibility, Resolution and compounding of forces, Resultant of coplanar-concurrent forces (Parallelogram law of forces, Principle of resolved parts, Triangle law of forces and Polygon law of forces), Resultant of coplanar non-concurrent forces and parallel forces (analytical and graphical method), Bow's notation, Space diagram, Vector diagram, Funicular polygon or string polygon, Moment of force, graphical representation of moment, Varignon's theorem-law of moments, Principle of moments, Simple lever, Couple, Properties of couple (simple numerical problems from UNIT-I)	5
UNIT-II	Equilibrium, Free body diagram, equilibrant, Relation between resultant and equilibrant, Algebraic conditions of equilibrium (force law of equilibrium and moment law of equilibrium), Principles of force equilibrium- Two force, Three force and Four force principle, Equilibrium of coplanar concurrent and non concurrent force system- analytical and graphical method of analysing equilibrium, Lami's theorem and its application for various engineering problems,	4

UNIT-III	Types of beams (Simple, Cantilever, Propped cantilever, Fixed or Encastre, Continuous and Overhanging beam), Statically determinate and indeterminate beams- definitions only, Supports (Simple, Hinged, Roller and Fixed support), Loads acting on beam (vertical and inclined point load, uniformly distributed load, uniformly varying load), Beam reactions for simply supported beam with or without overhang- engineering problems subjected to point load and combination of point load and uniformly distributed load, Beam reactions graphically for simply supported beam with vertical point load- simple numerical problems on analytical and graphical methods, Plane truss and Space truss (definition only), Assumptions in plane truss analysis, Relationship between number of joints and members in simple truss, External and internal redundancy, Method of joints analysis, Method of sections analysis, Graphical methods of truss analysis- simple numerical problems by method of joints and section only.	13
UNIT-IV	Centroid and Centre of Gravity, Centroid of geometrical plane figure (square, triangular, rectangular, circle, semicircle lamina and composite figure composed of not more than three geometrical figure, Centre of gravity of simple solids (cube, cuboid, cone, cylinder, sphere, hemisphere) and composite solids composed of not more than two simple solids, Moment of Inertia, Derivation of general formula for determination of moment of inertia for area and mass, Section modulus, Radius of gyration, Theorem of Parallel and perpendicular axes, Moment of inertia of simple geometrical figure (square, rectangle, circle, triangle) and composite sections .	8
UNIT-V	Definition of friction, Static and dynamic friction, Coulomb's Laws of friction , Types of friction, , Limiting friction, Coefficient of friction, Angle of friction, Angle of repose, Cone of friction, Equilibrium of bodies on level surface subjected to a force parallel and inclined to the plane, Equilibrium of bodies on an inclined plane subjected to a force parallel to the plane only, Simple engineering problems on ladder friction and wedge friction.	8
UNIT-VI	Machine, Simple machine and compound machine, Basic concepts and definition, Derivation of relation between M.A, V.R and efficiency, Ideal machine, Derivation of relation between M.A and V.R in ideal machine, Reversible and irreversible machine, Derivation of conditions for a machine to be reversible and irreversible, Maximum mechanical advantage and efficiency, Compound efficiency, Simple numerical problems on the concepts and topics on lifting machine, Velocity ratio of Simple wheel and axle, differential wheel and axle , worm and worm wheel, Simple screw jack, Single purchase and double purchase crab winch, Weston's differential pulley block, First system of pulleys- simple numerical problems	7

6. Course Title: Applied Physics Lab-II

COURSE TITLE: APPLIED PHYSICS LAB-II

COURSE CODE: BS-207

Total Marks:100

Practical Examination:40

Practical Sessional Marks:60

Learning Objectives: The main objectives are:

- (i) To provide an experimental foundation for the theoretical concepts introduced in the theory class.
- (ii) Demonstrate the principles taught in the class.
- (iii) Develop the habit of honesty, patience and teamwork.

Course Outcomes: On completion of this practical course, the students will be able to:

CO1: demonstrate the laws of light, find refractive index of material and focal length of lense.

CO2: find out magnetic poles and draw magnetic lines of force of bar magnet.

CO3: apply different apparatuses to find the values of different physical quantities (acceleration due to gravity, specific gravity, atmospheric pressure, water equivalent, velocity of sound and frequency of tuning fork).

Examination scheme:

Practical				Total Marks
Practical Test		Internal Assessment		100
Full Marks	Pass marks	Full Marks	Pass Marks	
40	16	60	24	

Chapter Title	Content
Properties of Liquid	1.Measurement of Specific gravity of solid, liquid, using Nicolson hydrometer, Hare's apparatus and specific gravity bottles etc.
Simple Harmonic Motion	2.To determine the value of acceleration due to gravity (g) of a place with Simple pendulum.
Wave & Sound	3. To measure the velocity of sound in Resonance tube. 4. To determine the frequency of a tuning fork using a Sonometer.
Light	5.0 To verify the laws of reflection using a plane mirror and to study the characteristics of image formed.
	6.0 To determine the refractive index of the material of the glass slab by pin method.
	7.0 To determine the focal length of a convex lens by U-V method.
	8.0 To determine the focal length of a convex lens by plane mirror method.

	9.0 To draw I-D curve and to determine the refractive index of the material of a prism.
MAGNETISM	10.0 To locate the poles of a bar magnet and to measure the magnetic length.
	11. To plot magnetic lines of force of a bar magnet with north pole pointing north and to locate the neutral point/to plot magnetic lines of force of a bar magnet with south pole pointing north and to locate the neutral point.
Heat	12. To determine the atmospheric pressure by using Boyle's law apparatus. 13. To determine water equivalent of a calorimeter by method of mixture.

7. Course Title: Introduction to IT Systems Lab

Course : Introduction to IT Systems Lab

Course Code: ES-208

Credits -2 (L: 0, T: 0, P: 4)

Course outcomes:

At the end of the course student will be able to

- 1: Search information effectively.
- 2: Connect peripherals and install device drivers.
- 3: Create static web pages using HTML and CSS
- 4: Create documents, spreadsheets and presentations.
- 5: Implement basic security measures to protect computer system.

Course Content:

Sl. No.	Topics for Practice
1	Browser features, browsing, using various search engines, writing search queries
2	Visit various e-governance/Digital India portals, understand their features, services offered
3	Read Wikipedia pages on computer hardware components, look at those components in lab, identify them, recognize various ports/interfaces and related cables, etc.
4	Install Linux and Windows operating system on identified lab machines, explore various options.
5	Connect various peripherals (printer, scanner, etc.) to computer, explore various features of peripheral and their device driver software.
6	Practice HTML tags-(HTML, HEAD, TITLE, BODY, TABLE, UL, OL, FORM, IMG, A, FONT etc. and their attributes). CSS Syntax □ CSS Id & Class □ CSS Styling □ Styling Backgrounds □ Styling Text □ Styling Fonts □ Styling Links □ Styling Lists Styling Tables □ CSS Border □ CSS Margin □ CSS Display □ CSS Positioning □ CSS Align □ CSS Types - Inline, Internal and External. Make your own Webpage.
7	Open Office Tools: Writer – Page setup, Table, Insertion of Pictures, Page Layout, Bullets, Insertion of objects and symbols, Header, Footer, Page Number, etc., Calc-format cell properties, formula, sort and filters, chart. Impress – Addition and Deletion of Slides, Design, Animation, Slide Show etc.
8	Explore security features of Operating Systems and Tools, try using them and see what happens. Explore the setting of Antiviruses and Firewalls.

This is a skill course. More you practice, better it will be.

8.Course Title: Fundamentals of Electrical and Electronics Engineering Lab

Course Code	:	ES 209
Course Title	:	Fundamentals of Electrical and Electronics Engineering Lab
Number of Credits	:	1 (L: 0, T: 0, P: 2)
Prerequisites	:	NIL
Course Category	:	ES

Learning Objective:

The main objectives are:

- To provide an experimental foundation for the theoretical concepts introduced in theory classes.
- Demonstrate the principles taught in the classes.

Course (Practical) Outcomes:

After successful completion of this course students will able to

CO1: Identify and use different electrical and electronics instruments

CO2: Apply and examine the theoretical knowledge to perform basic electrical and electronics experiments

S. No.	Name of Experiments	Approx. Hrs.	Electrical (EL) / Electronics (ET)	COs
1	Measure voltage, current and power in 1-phase circuit with resistive load.	02	EL	CO1, CO2
2	Measure voltage, current and power in R-L series circuit.	02	EL	CO1, CO2
3	Determine the transformation ratio (K) of 1-phase transformer.	02	EL	CO1, CO2
4	Connect single phase transformer and measure input and output quantities.	02	EL	CO1, CO2
5	Study the different parts of DC machines	02	EL	CO1
6	Identify and draw the figure of various wiring materials	02	EL	CO1, CO2
7	Identify various active and passive electronic components in the given circuit	02	EL	CO1
8	Connect resistors in series and parallel combination on bread board and measure its value using digital multimeter	02	ET	CO1, CO2
9	Connect capacitors in series and parallel combination on bread board and measure its value using multimeter	02	ET	CO1, CO2
10	Determine the value of a given resistor using digital multimeter and calculate the value with colour code.	02	ET	CO1, CO2

11	Test the PN-junction diode using digital multimeter.	02	ET	CO1, CO2
12	Identify three terminals of a transistor using digital multimeter	02	ET	CO1, CO2
13	Familiarization of different types of PCB and Soldering / Desoldering Practice	02	ET	CO1, CO2

9. Course Title: Engineering Mechanics Lab

Course Code	ES - 210				
Category	Engineering Science Course				
Course Title	Engineering Mechanics Laboratory				
Scheme and Credits	L	T	P	Credits	Semester-II
	0	0	2	1	
Pre-requisites (if any)	Physics, mathematics				

Learning Objectives:

Students will be able to:

LO1	Examine triangle law of forces graphically and calculate resultant, percentage error with the aid of Gravesand's apparatus.
LO2	Examine polygon law of forces graphically and calculate resultant, percentage error with the aid of Gravesand's apparatus or Universal Force Table.
LO3	Compare actual, analytical and graphical values of support reactions at the two ends of a simply supported beam on a Beam apparatus.
LO4	Calculate co-efficient of friction between two contact surfaces on a rough horizontal plane.
LO5	Calculate co-efficient of friction, angle of repose, mechanical advantage and efficiency of an inclined plane.
LO6	Examine the law of moments with the aid of Bell Crank Lever.
LO6	Calculate mechanical advantage, velocity ratio and efficiency of simple screw jack, worm and worm wheel, single purchase crab winch and first system of pulleys.

Course Outcomes:

On successful completion students will be able to:

CO1	Examine triangle law of forces, parallelogram law of forces and polygon law of forces with the aid of Gravesand's apparatus and Universal Force Table.
------------	---

CO2	Compare actual values of support reaction with analytical and graphical values of support reactions at two ends of a simply supported beam.
CO3	Calculate co-efficient of friction, angle of repose, mechanical advantage, velocity ratio of a body lying on horizontal and vertical plane.
CO4	Examine law of moment with the aid of Bell Crank Lever.
CO5	Calculate mechanical advantage, velocity ratio and efficiency of a simple lifting machine.

List of Practices:

Sl. No.	Topics For Practices	Periods (Hrs)
1	To verify triangle law of forces and parallelogram law of forces with the help of Gravesand's apparatus.	3
2	To verify the polygon law of forces with either Gravesand's apparatus or Universal Force Table.	3
3	To verify the reactions at the support of a simply supported beam	3
4	To find co-efficient of friction between two surfaces on a rough horizontal plane.	3
5	To find co-efficient of friction, angle of repose, M.A and efficiency of an inclined plane.	3
6	To verify the Law of Moments using a bell crank lever.	2
7	To find the mechanical advantage, velocity ratio and efficiency of a simple screw jack.	3
8	To find the mechanical advantage, velocity ratio and efficiency of a worm and worm wheel.	3
9	To find the mechanical advantage, velocity ratio and efficiency of a single purchase crab winch.	3
10	To find the mechanical advantage, velocity ratio and efficiency of the first system of pulleys.	3
Total Practices in Hrs		29

10.Course Title: Environmental Science

Course Code	AU-201				
Course Title	Environmental Science				
Scheme and Credits	L	T	P	Credits, C	Semester- II
	2	0	0	0	
Pre-requisites	High School Chemistry/Basic science				

Learning Objectives:

LO-1	Acquire knowledge for solving various engineering problems by applying ecosystem to produce eco – friendly products.
LO-2	Gain fundamental knowledge of air, noise, radiation, water and soil pollution control methods for solving domestic and industrial problems.
LO-3	To recognize relevant energy sources required for domestic and industrial applications.
LO-4	Gain skills for solving local solid and e-waste problems.

Course Outcomes: After the completion of the course the student will be able to understand:

CO-1	The ecosystem and terminology for solving various engineering problems applying ecosystem knowledge to produce eco – friendly products.
CO-2	The air, radiation and noise pollution along with their control measures and acts for solving domestic and industrial problems.
CO-3	The water and soil pollution along with their control measures and acts for solving domestic and industrial problems.
CO-4	Different renewable energy resources and efficient process of harvesting.
CO-5	Solid Waste Management, ISO 14000 & Environmental Management.

Detailed Course Content:

Unit	Topic/Sub-Topics	Hours
UNIT-I	1.0. Introduction to Environmental Studies and Ecosystems 1.1. Scope and importance of Environmental Science, environmental components. 1.2. Definition, principle and scope of ecology, definition and concept of Ecosystem, Structure of ecosystem, Biotic & Abiotic components. 1.3. Functions of Ecosystem: Physical (energy flow), Biological	5

	(food chains, food web, ecological succession), and Biogeochemical (nutrient cycling) processes. 1.4. Types of Ecosystems - Freshwater ecosystem (Lentic and Lotic) and terrestrial ecosystem (Forest, Grassland, Desert and Mountain Ecosystem)	
UNIT-II	2.0. Air, Noise and Radiation Pollution 2.1. Air Pollutions: Definition, types and sources of air pollution, air pollutant and its types, impact of air pollution on human health, environment and assets. 2.2. Global warming and greenhouse effect, ozone layer depletion and acid rain. 2.3. Air quality standards – NAAQS, AQI, Bharat Stage - VI Emission standards, Air pollution control measures. Air quality standards – NAAQS, AQI, Bharat Stage - VI Emission standards. Air pollution control measures. 2.4. Radiation pollution: Definition and types of radiation, sources, effects and control of radiation pollution. 2.5 Noise pollution: Definition, types, sources of pollution, measurement of pollution level, Effects of Noise pollution.	6
UNIT-III	3.0. Water and Soil Pollution 3.1. Definition, properties and Sources of freshwater. 3.2. Definition, Sources of water pollution, Types of water pollutants. 3.3. Characteristics of water pollutants, Physical, chemical and biological parameters for assessment of water quality. 3.4. Effect of water pollution on human health and environment. 3.5. Control of water pollution 3.6. Waste water treatment – Primary, secondary and tertiary methods. 3.7. Soil pollution - Causes, Effects and Preventive measures of Soil Pollution.	7

UNIT-IV	4.0. Renewable sources of Energy 4.1. Definition and type of renewable energy sources. 4.2. Solar Energy: Basics of Solar energy. Flat plate collector (Liquid & Air). Theory of flat plate collector. Importance of coating. Advanced collector. 4.3. Solar pond, Solar water heater, solar dryer, Solar stills. 4.4. Biomass: Overview of biomass as energy source. Thermal characteristics of biomass as fuel, Anaerobic digestion. Biogas production mechanism. Utilization and storage of bio-gas. 4.5. Wind energy: Current status and future prospects of wind energy. Wind energy in India. Environmental benefits and problem of wind energy. 4.6. New Energy Sources: Need of new sources. Different types new energy sources. 4.7. Applications of (Hydrogen energy, Ocean energy resources, Tidal energy conversion.) 4.8. Concept, origin and power plants of geothermal energy.	7
UNIT-V	5.0. Solid Waste Management, ISO 14000 & Environmental Management 5.1. Definition and type of waste. 5.2. Solid waste generation- Sources and characteristics of: Municipal and domestic solid waste, electronic waste (E-waste): Sources and types, constituents of e-wastes, recycling of e-waste and its environmental consequences, biomedical waste. Metallic wastes and Non-Metallic wastes (lubricants, plastics, rubber) from industries. 5.3. Collection and disposal of different types of solid wastes. 5.4. Waste Air quality act 2004, air pollution control act 1981, water pollution and control act 1996. Noise pollution (Regulation and Control) Rules, 2000. 5.5. Environmental management in fabrication industry. ISO14000: Implementation in industries, Benefits.	5

Curriculum Development cell, State Council for Technical Education, Directorate of Technical Education, Assam

Sl. No.	Name	Designation
1	Shri Dhrubajyoti Borah, ACS	Director of Technical Education, Assam
2	Dr. Indrani Gogoi	Joint Director, DTE, Assam
3	Dr. Mrinalini Das	Controller of Examinations, State Council for Technical Education, DTE, Assam
4	Shri Ankush Borgohain	Training cum Placement Officer, DTE, Assam
5	Shri Ashok Das	Principal, Assam Textile Institute
6	Dr. Utpal Baruah	Principal, Kamrup Polytechnic
7	Shri Boobool Sarma	Assistant Controller of Examinations, SCTE, DTE, Assam

Subject-wise Committees for Curriculum of Diploma in Engineering & Technology (2nd Semester)

Mathematics:

Sl No.	Name	Institute	Designation
1	Dr. Geetali Das, Lecturer(SG)	Assam Engineering Institute, Guwahati	Member Secretary
2	Dr. Parbin Ahmed, Lecturer(SG)	Assam Textile Institute, Guwahati	Member
3	Dr. Sampa Das, Lecturer (SG)	Dibrugarh Polytechnic, Dibrugarh	Member
4	Mrs. Gayatree Kakati Boruah.	PCPS Girls' Polytechnic, Guwahati	Member

Physics:

Sl No.	Name	Institute	Designation
1	Dr. Tulika Tamuly, Lecturer	Dibrugarh Polytechnic, Dibrugarh	Member Secretary
2	Dr. Snigdha Bhattacharjee, Lecturer	Karimganj Polytechnic, Karimganj	Member
3	Mr. Monzurul Kader Ahmed, Lecturer	Goalpara Polytechnic, Goalpara	Member
4	Mr. Prokash Pegu, Lecturer	Dibrugarh Polytechnic, Dibrugarh	Member

Sub-Committee for Applied Physics:

Sl No.	Name	Institute	Designation
1	Dr. Purabi Gogoi, Assistant Professor	DUIET, Dibrugarh University	Member
2	Mr. Jyotirav Mudiar, Assistant Manager	IOCL, Bongaigaon Refinery	Member
3	Dr. Samiran Hazarika, Lecturer	Bongaigaon Polytechnic	Member
4	Mr. Sanjeeb Kalita, Lecturer	Baksa Polytechnic	Member
5.	Himanshu Sharma Pathok, Lecturer	POWIET, Jorhat	Member

Introduction to IT Systems:

Sl No.	Name	Institute	Designation
1	Smt. Plabita Borbora, HoD, Computer Engineering	Assam Engineering Institute	Member Secretary
2	Maushumi Lahon, Lecturer (SG)	Assam Engineering Institute	Member
3	Sankha Pani Bharali, Lecturer (SG)	PCPS Girls Polytechnic	Member

Fundamentals of Electrical and Electronics Engineering:

Sl No.	Name	Institute	Designation
1	Shri Bhupati Das, Principal (i/c)	Nalbari Polytechnic	Member Secretary
2	Dr. Mitali Chakravorty, HOD (i/c)	Assam Engineering Institute	Member
3	Shri Bubumani Kalita, Lecturer (PT)	Nalbari Polytechnic	Member

Engineering Mechanics:

Sl No.	Name	Institute	Designation
1	Dr. Krishna Kamal Das, Member Secretary of Civil Engg Syllabus Committee	Bongaigaon Polytechnic	Member Secretary
2	Shri Ram Krishna Pathak, Member Secretary of Mechanical Engg Syllabus Committee	Dibrugarh Polytechnic	
3	Dr. Dimbalita Deka, Assistant Professor	Golaghat Engineering College	Member
4	Zeenat Arman, Lecturer	Barpeta Polytechnic	Member
5	Chiranjeeb Barua, Lecturer	Barpeta Polytechnic	Member
6	Anusuya Gowami, Lecturer	Sonitpur Polytechnic	Member
7	Bidisha borthakur, Lecturer	Golaghat polytechnic	Member

Environmental Science:

Sl No.	Name	Institute	Designation
1	Smt. Anita Saikia, Lecturer (SG)	Assam Engineering Institute	Member Secretary
2	Shri Ramen Bharali, Lecturer (SG)	Nowgong Polytechnic	Member
3	Shri Bedanta Barhoi, Lecturer (PT)	Lakhimpur Polytechnic	Member
4	Shri Pankaj Goswami, Lecturer (SG)	Silchar Polytechnic	Member
5	Mr. Tayab Ali, Lecturer (SS)	POWIET, Jorhat	Member
6	Shri Debabrata Talukdar, Lecturer (SG)	Silchar Polytechnic	Member

REVIEWERS:

1. Md. Sabikur Rahman, Jorhat Engineering College.
2. Dr. Afazuddin Ahmed, Assam Engineering College.
3. Dr. Gitanjali Mazumdar, Assam Engineering College.
4. Mr. Kishor Kumar Das, Assam Engineering College.
5. Dr. Pankaja Das, Assam Engineering College.
6. Ms. Anakshi Das, Assam Engineering College.
7. Dr. Parasa Hazarika, Jorhat Institute of Science & Technology.
